ARE QUOTED. PLEASE SEE SCHEDULE OF PRICES IN CENTERFOLD.

BUSINESS HOURS

Visitors are always welcome at our nursery, however we ask you to please note our business hours. We are open from 8 A.M. to 12 Noon and from 1 P.M. to 5 P.M. every day except Sunday and Wednesday. We are closed all day Wednesday and close at Noon on Sunday. If you are driving to the nursery you will find us at the Brick House on the Wappasening Creek Road, midway between Windham and West Warren, Pa., 30 miles southwest of Binghamton, N. Y., 25 miles north of Towanda, Pa., 14 miles east of Sayre, Pa., 8 miles south of Nichols, N. Y. Windham, Pa. is shown on all Pennsylvania road maps but not listed in the directories of the maps.

Because of the nature of these dwarf and miniature plants it is virtually impossible to sell them by the inch, therefore we propose to sell them by age. Our basic plants are 3 or 4 years old. When "Large Size" is indicated it means the plant in question is one or two years older and represents a fuller, more mature specimen, not necessarily one larger in inches.

DWARF CONIFERS

All the dwarf trees offered here are young plants and do not yet represent their ultimate size or aspect. With the exception of the *Juniperus Horizontalis* varieties they are all extremely dwarf and slow growing kinds that will develop into very neat and compact, exceedingly attractive conical, globose or low spreading forms. All are admirably adapted to rock garden work. The *Juniperus Horizontalis* varieties are quick growing prostrate plants that develop into lovely evergreen ground covers.

All these miniature trees are grown from cuttings and are on their own roots. We do not propagate or sell grafted plants. These little trees are now of the proper size for planting in miniature sink or trough gardens and for Bonsai work. They are all easy to grow in moderately rich, well drained garden soil that is neutral to slightly acid (pH 5-7). They all prefer full sun but can be grown successfully in light open shade. The *Chamaecyparis* and *Cryptomerias* appreciate shade especially in the afternoon when the sun is at its hottest. All these trees are hardy to 30 degrees below zero, but the *Chamaecyparis* and *Cryptomerias* should be protected from drying winds in exposed positions and shaded from the winter sun.

NURSERY LOCATED AT THE BRICK HOUSE, WINDHAM, PA.

- CHAMAECYPARIS LAWSONIANA FORSTECKIANA. A tight blue-green ball with the branchlets twisted and clustered into cockscombs\$2.50
- CHAMAECYPARIS LAWSONIANA MINIMA. A tight globe form with feathery dark green branchlets, colored blue on the undersides\$2.25
- Large size\$3.00
- CHAMAECYPARIS OBTUSA NANA. Broad irregular conical form with stiff, upright branches and very close growing light green branchlets\$2.50
- CHAMAECYPARIS PISIFERA FILIFERA AUREA NANA. Semi-prostrate or broad globes form with long, thin thread-like branchlets painted with golden yellow\$2.25
- CHAMAECYPARIS PISIFERA PLUMOSA COMPACTA AUREA. A semi-dwarf plume cypress with feathery foliage colored a subdued shade of golden yellow. It forms a broad globe shape and is a rather rapid grower. It should be sheared annually to keep it in prime condition\$2.25
- CHAMAECYPARIS PISIFERA PLUMOSA COMPACTA PLATINUS. Similar in growth and habit to the one above. The fine plummy foliage is colored a very light shade of green and the new growth almost a platinum white\$2.25
- CHAMAECYPARIS PISIFERA PLUMOSA MINIMA. A broad feathery dark green ball shape with closely set plume-like branches\$2.25
- Large size\$3.00
- CHAMAECYPARIS PISIFERA SQUARROSA AUREA PYGMAEA. A very tiny ball shaped plant with close mossy foliage colored golden yellow\$2.25
- CHAMAECYPARIS PISIFERA SQUARROSA CYANO-VIRIDIS. A moderately dwarf, dense oval shaped tree with striking light blue-green color\$2.25
- CHAMAECYPARIS PISIFERA SQUARROSA MINIMA. A very slow growing dense little ball with mossy, silvery blue foliage\$2.25
- CHAMAECYPARIS PISIFERA SQUARROSA NANA. A rather rapid grower that forms a nice fluffy mound of attractive blue. It turns bronzy in fall. \$2.25
- CRYPTOMERIA JAPONICA NANA. Very stiff, tiny needle leaves on stout branches in a very slow growing tight globose form\$2.50
- CRYPTOMERIA JAPONICA VILMORIANA. Very much like Nana, but much dwarfer, tighter and slower growing\$2.50
- JUNIPERUS COMMUNIS COMPRESSA. A very tiny Irish Juniper. Fine light gray-green foliage in a slender columnar form\$2.25
- JUNIPERUS COMMUNIS SAXATILIS. Semi-prostrate to broad vase-shape in striking steel blue color. A native of the Hudson Bay area that is ideally suited to rock gardens\$2.25
- JUNIPERUS HORIZONTALIS BAR HARBOR. The best of the prostrate Junipers for ground cover work. A quick growing dense mat of attractive steel-blue throughout summer and winter\$1.95

MAYFAIR NURSERIES, R. D. 2, NICHOLS, N. Y.

JUNIPERUS HORIZONTALIS BLUE HORIZON. Prostrate mat of thin, tapering branchlets colored a pleasing shade of blue. A form with distinctive character	\$1.95
Large size	\$2.75
JUNIPERUS HORIZONTALIS MARCELLUS. A prostrate mat with broad, plumey branchlets of a lovely blue-green color	\$1.95
JUNIPERUS PROCUMBENS NANA. A very dense and slow growing mat of short stiff branches and sharp spiny bluish leaves	\$2.25
JUNIPERUS SQUAMATA MEYERI. A semi-dwarf, dense irregular upright grower with bluish-white color, painted with pink and purple in winter	\$1.95
JUNIPERUS SQUAMATA PROSTRATA. A slow growing prostrate billowy mat of attractive blue-gray color throughout the year	\$2.50
PICEA ABIES CLANBRASSILIANA. A dense and slow growing spruce of light green color and broad globe form	\$2.25
PICEA ABIES MUCRONATA. A dense conical form of bright green color. A good dwarf of moderately rapid growth	\$2.25
PICEA ABIES NIDIFORMIS. The popular Birds Nest Spruce. A broad globe form with open top and dark green color	\$2.25
PICEA ABIES PROCUMBENS. A broad spreading globe with decumbent or weeping habit and very dark green color	\$2.25
PICEA ABIES PUMILA. A compact round, slow growing form with very dark green color	\$2.25
PICEA ABIES SHERWOODII. A semi-dwarf of fairly rapid growth with irregular Japanesque broad mound form. Very nice for rock garden specimen. \$2.25	
PICEA GLAUCA CONICA. The ever popular dwarf Alberta Spruce. Very fine light gray-green leaves on thin branchlets in a very dense narrow conical form	\$2.25
THUJA OCCIDENTALIS ELLWANGERIANA AUREA. Low fluffy mounds of fine golden foliage makes this an attractive and unusual plant. Very much unlike an Arbor-Vitae	\$2.25
THUJA OCCIDENTALIS MINIMA. An extremely dwarf and very slow growing tiny ball shaped Arbor-Vitae. Light green color, turning bronzy in fall. \$2.25	
THUJA OCCIDENTALIS PUMILA SUDWORTHII. A dwarf globe arbor-vitae colored a glowing golden color. A most striking plant for a color accent. \$2.25	

TSUGA CANADENSIS

Probably the most coveted of the dwarf conifers are the dwarf Hemlocks. There are many, many varieties but they are all extremely scarce. I have been propagating several varieties for a number of years and now have a few plants of the following kinds to spare. These are 3 to 4 or more years old but they are small. Do not expect too much for your money.

NURSERY LOCATED AT THE BRICK HOUSE, WINDHAM, PA.

- TSUGA CANADENSIS BENNETT. A graceful broad mound form with the tiny twigs arranged in broad sweeping fans. Best described as a dwarf Sargent's Hemlock \$3.50
- TSUGA COLES PROSTRATE. A completely prostrate plant that follows the contour of the ground. A rather rapid grower once it gets established. It will eventually spread to several feet in diameter \$3.50
- TSUGA JERVIS. An extremely dwarf and slow growing tree with dense twiggy growth. It is irregularly globose when young and develops into a broad conical shape with age \$3.50
- TSUGA RUGGII. A light green dense ball with the tip of each tiny twig a bright cinnamon color. Very slow growing \$3.50
- TSUGA DIVERSIFOLIA NANA. A Japanese species with tiny, thick, dark green needles. It forms an open ball shape and is quite slow growing when young. I don't know how big it will get \$3.50

HEATH AND HEATHER

Undoubtedly the Heaths (*Erica*) and the Heathers (*Calluna*)—and included here for the sake of convenience—*Bruckenthalia* are among the prettiest and most useful of dwarf flowering shrubs. They are ideal for rock garden work and for the foreground of shrub borders and foundation plantings. They are all evergreen, with attractive growth habits and a wide range of colors from purest white to shades of pink, red and purple. With a balanced collection of these plants, flowers can be had through every month of the year. They are easy to grow if they are given a light, peaty, sandy acid leafmold soil. Although they all prefer full sun, they will stand some light shade. In the north it is recommended that they be mulched with peatmoss or pine needles at the base of the plants and covered over with straw or evergreen boughs to prevent dehydration in the winter. They will all stand 30 degrees below zero under ideal conditions. In severely exposed positions and during years of little snow, some winter damage may occur. However, if damaged plants are cut back they recover very quickly and make a fine show of themselves without any serious or permanent ill effects.

Unless specifically noted all the plants offered here are three years old and are from two to six or eight inches high or broad, according to variety and habit of growth. All are nice bushy little plants, ready to bloom and make a fine showing of themselves the first year.

- BRUCKENTHALIA SPICULIFOLIA. (Balkan Spike Heath). Fine spruce-like leaves on decumbent branches forming a billowy mat. Spikes of pink flowers in June and July \$1.95

MAYFAIR NURSERIES, R. D. 2, NICHOLS, N. Y.

- CALLUNA VULGARIS MAYFAIR. A profuse flowering form of the typical Scottish Heather. A broad, bushy upright grower with lavender flowers from July to September\$1.95
Large size\$2.75
- CALLUNA VULGARIS ALBA. Pure white flowers from July to September on dense bushy plants of a bright, fresh green color\$1.95
Large size\$2.75
- CALLUNA VULGARIS COUNTY WICKLOW. Fully double clear pink flowers from July to October on rounded bushy plants\$1.95
Large size\$2.75
- CALLUNA VULGARIS CRISPA. Bright, crisp green foliage on stiff upright branches forming an attractive mound. White flowers from July to September. \$1.95
Large size\$2.75
- CALLUNA VULGARIS ELSE FRYE. A very low, semi-prostrate plant of fresh green color producing quantities of fully double white flowers from July to October\$1.95
Large size\$2.75
- CALLUNA VULGARIS FOXII NANA. A tiny little tuft of dark green mosslike growth never more than 4 or 5 inches high. Short spikes of lavender flowers in July and August\$1.95
- CALLUNA VULGARIS HIRSUTA. An attractive mound of slender twiggy upright growth covered with fine silky hairs and purple flowers in July and August\$1.95
Large size\$2.25
- CALLUNA VULGARIS J. H. HAMILTON. One of the best varieties. A low, spreading plant with thick, dark green foliage and masses of double bright pink flowers from July to October\$1.95
- CALLUNA VULGARIS KUPHALDTI. An interesting prostrate mat forming variety with its slender branchlets forming swirls and curls. Lavender flowers in July and August\$1.95
- CALLUNA VULGARIS MINIMA. A dwarf, dense ball shaped plant with mossy foliage and the new growth tinted with pink. Short spikes of lavender flowers in July and August\$1.95
Large size\$2.75
- CALLUNA VULGARIS MRS. H. E. BEALE. A tall, upright plant with large pale pink double flowers on spikes sometimes 24 inches long, from July to November\$1.95
Large size\$2.75
- CALLUNA VULGARIS MRS. PAT. One of the prettiest. A dainty little dark green cushion with the tips of the new growth a vivid bright pink. Lavender

NURSERY LOCATED AT THE BRICK HOUSE, WINDHAM, PA.

flowers in July and August	\$1.95
Large size	\$2.75
CALLUNA VULGARIS MRS. R. H. GRAY. A prostrate ground cover variety with broad, dense mats of heavy dark green foliage and lateral spikes of lavender flowers in July and August	
Large size	\$1.95
Large size	\$2.75
CALLUNA VULGARIS NANA COMPACTA. A dwarf mound forming plant with fine mossy foliage on close growing spires and short spikes of lavender flowers in July and August	
Large size	\$1.95
Large size	\$2.75
CALLUNA VULGARIS PLENA. A vigorous upright grower with sturdy stems of dark green color bearing thick spikes of fully double purple flowers from July to September	
Large size	\$1.95
Large size	\$2.75
CALLUNA VULGARIS RIGIDA. A distinctive sort with bright, fresh green color through winter and summer. Stiff and gnarled horizontal branches and small clusters of white flowers in summer	
Large size	\$1.95
Large size	\$2.75
CALLUNA VULGARIS ROSEA. A large bush with gracefully arching branches and masses of rosey lavender flowers in July and August. A very profuse bloomer	
Large size	\$1.95
Large size	\$2.75
CALLUNA VULGARIS RUBRA. A compact rounded mound of slender twiggy growth and spikes of very dark and deep reddish purple flowers. As close to red as any heather comes	
Large size	\$1.95
Large size	\$2.75
CALLUNA VULGARIS SISTER ANNE. An exquisite plant of unsurpassed charm. A prostrate grower forming thick mats of dark green foliage covered with soft downy hairs, giving it a silvery appearance. Lavender flowers in short lateral sprays from July to September	
Large size	\$1.95
CALLUNA VULGARIS TIB. A mound of upright slender branchlets and a long season of double dark red-purple flowers extending from late June to December	
Large size	\$1.95
Large size	\$2.75
CALLUNA VULGARIS TOMENTOSA. A large vigorous upright grower with thick branches clothed in silvery green foliage. Large spikes of glistening deep purple flowers in July and August	
Large size	\$1.95
Large size	\$2.75
ERICA CARNEA KING GEORGE. Bright pink flowers in March. In habit of growth it is intermediate between Ruby Glow and Springwood.	

- MAYFAIR NURSERIES, R. D. 2, NICHOLS, N. Y.
- ERICA CARNEA RUBY GLOW. A slow growing mound of dark reddish green decumbent branches covered with bright ruby red flowers in March and April\$1.95
- ERICA CARNEA SNOW QUEEN. The dwarfest of the carnea varieties and the earliest to flower. Slowly spreading mats of fresh green foliage and white flowers from early February to April\$1.95
- ERICA CARNEA SPRINGWOOD. A very fast spreading mat of dark green foliage and covered with bright pink flowers from February to April. An exceptional good ground cover plant\$1.95
- ERICA CARNEA SPRINGWOOD WHITE. A quickly spreading ground cover as above but with light green leaves and white flowers in quantity from February to April and May\$1.95
- ERICA CARNEA VIVELLI. Beautiful dark reddish green foliage in a slowly spreading mat and bright crimson flowers in April and May\$1.95
- ERICA CARNEA WINTER BEAUTY. A compact, low mound forming plant with dark foliage and bright pink flowers in March and April\$1.95
- ERICA CINERIA ATRORUBENS. A little spreading mound of very tiny dark green leaves and tipped with bronze with bright glistening satiny red flowers from July to October\$1.95
- ERICA CINERIA VIOLACEA. Growth habit as above but with glistening deep purple flowers\$1.95
- ERICA DARLIENSIS. A rounded mound of dark green leaves on sturdy stems and lovely sprays of cherry red flowers that begin to color in November and last through the winter, coming into full bloom in March and April ..\$1.95
- ERICA TETRALIX. Graceful mounds of thin decumbent branches covered with soft, downy gray green foliage, topped with short spikes bearing little clusters of porcelain pink urn-shaped flowers from July to October\$1.95
- ERICA TETRALIX MOLLIS. A more upright grower with lovely silvery gray foliage and urns of pure white from July to October\$1.95
- ERICA VAGANS ALBA. A rounded mound of sturdy upright growth, each stem crowned with a halo of brown anthered white flowers in July and August.\$1.95
- ERICA VAGANS MRS. D. F. MAXWELL. Growth habit as above with large clusters of vivid pink flowers from July to October\$1.95
- ERICA WILLIAMSII. An attractive billowy, low mound of soft light green foliage and clusters of charming light pink flowers from June to October. The new growth is tinted with gold and pink\$1.95

PLEDGES

WE GUARANTEE LIVE DELIVERY AND COMPLETE SATISFACTION OR YOUR MONEY BACK

If you are not completely satisfied with the plants you receive, return them to us within 10 days for refund or replacement, whichever you prefer. We cannot and do not guarantee that you will be able to grow some of the difficult items contained in this list or that they will survive in the location you plan them. However, we will replace at half price any plants that die within 90 days of the date of shipment. Our plants are individually wrapped in aluminum foil with all their roots intact to insure live delivery.

THE PRICES QUOTED IN THIS LIST INCLUDES POSTAGE AND PACKAGING

There are no hidden charges! All orders are sent prepaid via regular Parcel Post at our expense within the U. S. except Alaska and Hawaii. If you desire air delivery, special delivery, special handling or any delivery other than regular Parcel Post, you must pay the full amount of the shipping costs.

PRICE SCHEDULE

The prices quoted in this list are for **single** plants only. If you order three or more plants in the same price range they take the prices quoted below. The plants in question do not necessarily have to be in the same variety but merely in the same price range. For example: *Juniperus squamata meyeri* \$1.95, *Calluna vulgaris* Mayfair \$1.95 and *Erica darliensis* \$1.95 would be \$1.85 each or \$5.55. **Boxed specials in this price list cannot be counted toward these quantity prices.**

POLICIES

This price list cancels all previous catalogs, lists, advertisements and special offers. Prices in this list are subject to change without notice. All the plants in this list are offered subject to prior sale and crop failures beyond our control.

MINIMUM ORDER 3.00. The minimum order we can possibly handle is \$3.00. If you desire only one or two plants please remit the minimum \$3.00.

CASH WITH ORDER. All orders must be accompanied with remittance which may be made by check, Postal Money Order or cash when letters are registered. Under no circumstances will we be responsible for money lost in the mails. Please make checks payable to MAYFAIR NURSERIES.

SHIPMENT: Due to the closing of our railroad and Railway Express Office all orders will be sent via regular Parcel Post at our expense. Our shipping season starts between April 1st and 15th, if we are not covered with snow, and extends to late fall, about December 1st.

SUBSTITUTION. In the event we are sold out of a variety we shall send a substitute or hold credit for a future order according to your instructions. If we receive no instructions we shall hold credit for a future order. PLEASE SEND US A LIST OF A FEW ALTERNATE SELECTIONS TO HELP US EXECUTE YOUR ORDERS QUICKLY.

CULTURAL DIRECTIONS are indicated on the label of each variety.

NURSERY LOCATED AT THE BRICK HOUSE, WINDHAM, PA.

OUTSTANDING DWARF SHRUBS

In the following list all the plants preceded by a double asterisk (**) are Ericaceous plants and must have a sandy peaty acid leafmold soil to succeed (pH 4-5). All the plants preceded by a single asterisk (*) are acid lovers and must have a well drained humus rich or peaty loam to succeed (pH 5-6). All others will thrive in any ordinary well drained garden soil (pH 6-8). Complete descriptions and cultural directions for these plants will be found in our Handbook.

- ALLIUM SENESCENS GLAUCUM. Lovely swirls of twisted blue-gray leaves and clusters of pink flowers in August and September \$1.25
- ** ANDROMEDA GLAUCOPHYLLA. Little clumps of upright stems with leathery glaucous leaves topped with enchanting pink bells in April and May. \$1.95
- ** ANDROMEDA POLIFOLIA. A large plant with long leathery dark green leaves and large light pink flowers in spring \$1.95
- ** ANDROMEDA POLIFOLIA GRANDIFLORA COMPACTA. A low, spreading plant with beautiful blue-gray leathery leaves and large shell pink bells . . \$1.95
- ** ANDROMEDA POLIFOLIA MONTANA. Wiry stems with small leathery leaves and quantities of dainty pink bells like miniature Japanese lanterns in April and May \$1.95
- ** ANDROMEDA POLIFOLIA NANA. Very narrow dark green leaves on short wiry stems and the same enchanting pink bells as above \$1.95
- ** ARCTOSTAPHYLOS UVA-URSI. (Bearberry). Long trailing vine-like stems with small leathery leaves that form a thick, fast growing ground cover. White bells and red berries \$1.95

BEARBERRY SPECIAL

We have a large supply of Bearberry on hand that we would like you to have for its beauty, dependability and usefulness. It is an excellent evergreen ground cover for use in sun or light shade. It is an Ericaceous plant that wants an acid sandy or peaty soil. To be effective it should be planted in quantity, therefore we are offering it in these attractive quantity prices:

100 plants at \$85.00 (25 or more plants at the 100 rate)

1000 plants at \$750.00 (250 or more plants at the 1000 rate)

- * BERBERIS BUXIFOLIA NANA. A compact little evergreen shrub with little dark reddish green leaves and comparatively large orange flowers . . . \$1.95
- * BERBERIS CANDIDULA. A very dwarf evergreen with holly-like leaves. Large solitary yellow flowers and black berries. It is like a miniature Berberis Verruculosa \$1.95

MAYFAIR NURSERIES, R. D. 2, NICHOLS, N. Y.

BUXUS MICROPHYLLA KOREANA. A hardy, dwarf Boxwood that forms a rounded ball from 12 to 18 inches high and just as broad. It can be sheared to any shape or height for tiny formal edgings \$1.95

BUXUS MICROPHYLLA KOREANA

for edging

In Lots of 10 or More:

\$1.00 Each

In Lots of 100 or More:

85c Each

BUXUS MICROPHYLLA NANA COMPACTA. An extremely dwarf box with tiny leaves in a tight little ball \$1.95

**CASSIOPE LYCOPODIOIDES. A tiny Arctic plant with creeping stems of scale-like leaves and elfin white bells dangling from red stems in April . . . \$2.25

COTONEASTER CONGESTA. A semi-prostrate, wide spreading evergreen shrub with little white flowers in spring and large red berries in fall \$1.95

COTONEASTER DAMERII. A mat forming plant with trailing stems bearing large evergreen leaves. White flowers followed by red berries in fall \$1.95

COTONEASTER HORIZONTALIS LITTLE GEM. A very dwarf Rockspray. Short horizontal branches forming a compact low mound with tiny shining green leaves that turn crimson in fall \$1.95

COTONEASTER MICROPHYLLA THYMIFOLIA. A mass of intricately spreading stiff stems with very tiny evergreen leaves. White flowers in spring and red berries in fall \$1.95

CYTISUS DECUMBENS. A little creeping Broom with almost leafless green stems bearing quantities of bright yellow flowers in April and May \$1.95

CYTISUS PURPUREUS. A spreading mass of tall arching stems with narrow clover-like leaves and masses of flowers like large purple butterflies. \$1.95

*DAPHNE CNEORUM. The very lovely and ever popular Garland flower. \$3.00

*DRYAS OCTAPETALA TENNELLA. An extremely dwarf Dryas with tiny light green leaves forming a tight mat about five inches high. Delightful eight petaled white flowers on 3 inch stems in May \$1.95

**EPIGAEA REPENS. The covered Trailing Arbutus. Pot plants grown from cuttings. Sold out for 1963. We will accept orders for 1964 delivery. \$2.25

*EPIMEDIUM ALPINUM RUBRUM. Airy clumps of compound heart shaped leaves and delicate sprays of pink flowers in April \$1.25

*EPIMEDIUM YOUNGIANUM NIVEUM. Graceful delicate clumps of little heart shaped leaves and airy sprays of white flowers in April and May . . . \$1.25

NURSERY LOCATED AT THE BRICK HOUSE, WINDHAM, PA.

- ***EPIEDIUM YOUNGIANUM VIOLACEUM.** Similar to niveum but with lilac colored flowers\$1.25
- GENISTA GERMANICA.** A low, very spiny evergreen shrub with a mass of bright yellow flowers through May and June\$1.95
- GENISTA PILOSA.** A lovely spreading mound of silvery green gleaming with bright yellow flowers in May and June\$1.95
- GENISTA SAGITTALIS.** A prostrate mat of flat, strap-like stems producing upright flower stems, each terminating in a cluster of yellow flowers in May.\$1.95
- HEBE DECUMBENS.** A dandy dwarf shrub with thick little gray green leaves each edged with red and short spikes of white flowers in May\$1.95
- HEDERA COLCHICA.** A climbing heart shaped Ivy from Persia. Very thick and stiff leathery leaves on stout tenacious vines. The leaves are lightly veined and somewhat mottled, particularly in winter\$1.95
- HEDERA HELIX CONGLOMERATA.** Small, closely set, crinkly, wavy leaves on thick decumbent branches, forming a low, slowly growing mound. \$1.95
- ***ILEX CRENATA HELLERII.** A very slow growing form of Japanese Holly. Very tiny leaves on short rigid stems making a flat topped evergreen globe. \$1.95
- ***ILEX PERNYI.** A moderately slow growing conical shrub with very spiny typical holly leaves and large bright red berries\$2.25
- ****KALMIA POLIFOLIA MICROPHYLLA.** A very dwarf bog laurel with tiny leaves on sturdy upright stems and bearing whorls of large pink flowers in May.\$1.95
- ****KALMIA POLIFOLIA ROSEMARINIFOLIA.** A tall plant about 2 feet high with long and very narrow leaves on thin stems, topped with large clusters of very attractive mauve-pink flowers in May. It is best planted behind plants of fuller growth to lend it some body\$1.95
- ****LEIOPHYLLUM BUXIFOLIUM INTRICATUM.** A delightful prostrate Sand Myrtle that forms broad billowy mats of thin stems covered with small dark green leathery leaves. Terminal clusters of starry white flowers in May\$1.95
- ***PACHISTIMA CANBYI.** A low, slowly spreading evergreen shrub with box-like leaves and inconspicuous flowers used for ground cover and edging. \$1.95

PACHISTIMA CANBYI

for

edging and ground cover work.

MAYFAIR NURSERIES, R. D. 2, NICHOLS, N. Y.

- ** **PIERIS JAPONICA VARIEGATA.** A very dwarf and compact Lily-of-the-Valley Bush with lovely variegated foliage\$1.95
Large size\$2.75
- * **PRIMULA JULIANA WANDA.** A little mat forming Primrose with low foliage and masses of deep red-purple flowers in April\$1.25
- ** **RHODODENDRON FASTIGIATUM.** A Japonicum Rhododendron with attractive, tiny blue-green evergreen leaves on a bushy, twiggy plant from 6 to 18 inches high with showy, bright deep purple flowers in late April ..\$2.25
- ** **RHODODENDRON FLAVITUM.** A twiggy plant from 6 to 12 inches high with tiny leaves and very pale yellow flowers\$2.25
- ** **RHODODENDRON IMPEDITUM.** A very tiny evergreen with small leaves and showy deep purple-blue flowers early in April\$2.25
- ** **RHODODENDRON INDICUM FLAME CREEPER.** A semi-prostrate azalea with large, bright flame-colored flowers in late May and June. This plant is not hardy here and is grown in a greenhouse, but it can be used in the open along the coast from Long Island southward\$1.95
- ** **RHODODENDRON MACRANTHA.** A semi-dwarf azalea that is hardy to 20 degrees below zero. It has evergreen foliage and very large bright, clear pink flowers in May. It is a spreading, almost prostrate plant with a height of about 12 to 15 inches\$2.25
- ** **RHODODENDRON MYRTIFOLIUM.** A compact, rounded evergreen with dark leathery leaves that turn purple-bronze in fall. Clear pink flower in May.\$2.25
- ** **RHODODENDRON OBTUSUM JAPONICUM.** A dwarf semi-evergreen azalea with compact almost prostrate stems and covered with lovely lavender-pink flowers in May\$1.95
- ** **RHODODENDRON RACEMOSUM.** A dwarf, very slow growing plant with leathery leaves, glaucous beneath and cherry clusters of bright flowers in April and May\$2.25
- ** **RHODODENDRON RAMAPO.** An extremely hardy dwarf hybrid with small oval leaves and large clusters of purple flowers in April and May ...\$2.25
- ** **RHODODENDRON WILSONII.** A semi-dwarf hybrid that eventually reaches a height of about 3 feet. Long, narrow dark green leaves and lovely bright rose-colored flowers in May\$2.25
- ** **SALIX UVA-URSI.** A dwarf prostrate Arctic willow that forms a dense prostrate mat about 2 or 3 inches high\$2.25
- SEDUM POPULIFOLIUM.** A rare and unusual shrubby sedum that grows about 2 feet high with sturdy woody branches bearing large fleshy poplar-like leaves and clusters of white flowers\$1.95

NURSERY LOCATED AT THE BRICK HOUSE, WINDHAM, PA.

- SPIRAEA BULLATA. A dwarf, deciduous mound of stiff, twisted stems with dark green, crispy, crinkly leaves and little clusters of bright pink flowers from May to frost\$1.95
